Customer Reviews

I have both. The textbook is still valuable to me. Two people grabbed at this paperback without reading the description because it was inexpensive... then they wrote a review of their mistake.

Just as described and arrived as expected.

This was described [since edited] as the textbook, not the workbook. Four weeks later I am still awaiting confirmation of the returned item...no effort on 's or seller's part to remedy. Stay away.

Had to return this book, we were looking for the text book and through the description that I first saw on line I believed that it was a text book and not a workbook
