The American Diabetes Association/JDRF Type 1 Diabetes Sourcebook

Synopsis

The American Diabetes Association/JDRF Type 1 Diabetes Sourcebook serves as both an evidence-based reference work and consensus report outlining the most critical components of care for individuals with type 1 diabetes throughout their lifespan. The volume serves not only as a comprehensive guide for clinicians, but also reviews the evidence supporting these components of care and provides a perspective on the critical areas of research that are needed to improve our understanding of type 1 diabetes diagnosis and treatment. The volume focuses specifically on the needs of patients with type 1 diabetes and provides clear and detailed guidance on the current standards for the optimal treatment of type 1 diabetes from early childhood to later life. To accomplish the book's editorial goals, Editors-in-Chief, Drs. Anne Peters and Lori Laffel, assembled an editorial steering committee of prominent research physicians, clinicians, and educators to develop the topical coverage. In addition, a Managing Editor was brought on to help the authors write and focus their chapters.

Customer Reviews

Even with my science/medical background, some of the articles were a bit esoteric (mABs) vs. practical. My doctor was impressed that we went to effort to obtain this.

It is nice to have a book about type 1 diabetes is a sea of books devoted to type 2 diabetes.

She is one of the world experts on Diabetes and consistently does a superb job of writing and editing. This book is intended for Diabetes professionals and contains a wealth of information. I would recommend anything by her with only the caveat that, in a field that is moving fairly quickly, some of the material becomes dated. It would be my wish to see more of her material on a subscription basis with continual updates. Should be in the library of every Diabetes professional along with her other books. If you have access to her lectures, these are excellent also. Her total opus covers a wide range, from patient education, through management & metabolism/biochemistry, to handling emergencies.
